

Caltex Sylvia Park

Caltex Sylvia Park is one of the busiest Caltex sites within New Zealand. Caltex Sylvia Park have been a leader within the Caltex brand over the 10 years of operation. The business is located in the heart of the largest business park and shopping center in the Auckland suburb of Mount

Wellington.

With more than 1000 business transaction per day and 8,760 operation hours per year, *Caltex Sylvia Park* had two dilemmas; the cost of power and the disruption of lighting maintenance.

To overcome these issues, Caltex Sylvia Park chose to replace its existing lights to LEDX lighting products. LEDX products have granted a minimum 70,000 hours of life span for each of its lighting products.

Improved lighting from LEDX lights has created an improved shopping experience for their customers. The LEDX lights have improved ambiance which entices shoppers to spend longer in store, which in turn, leads to increased revenue per customer.. Furthermore, as the LEDX lights installed are 60% more energy efficient than traditional lighting options, a reduction in operation cost has resulted.

The bottom line: better quality lighting that's better for the environment.

Technopack Limited

Technopack is a globally recognised leader in the design, manufacture and installation of high value sanitary powder. Their products are responsible for handling and conveying systems for the dairy, infant formula, nutrition and pharmaceutical industries. A truly global company; Technopack has installed machines and systems in

the USA, China and Australia as well as supplying many New Zealand companies. It is the only business in the world producing modular, future-proof hygienic dry powder packaging lines for the dairy and pharmaceutical industries. Technopack has worked closely and supplied its services and products to Fonterra, NUTRICIA and the Dairy Farmers of America (DFA)

In an effort to provide a better, healthier work environment for it's busy staff, *Technopack* decided to find a more efficient and productive lighting solution. LEDX LED Panel Lights were the obvious choice. Installed into the offices of Technopack, LEDX LED spinel-lights systems have created an improved working experience for staff. The lighting products installed create a more natural ambience, while at the same time, being more efficient to run. The results to Technopack: happier staff and lower overheads.

Point Chevalier

Point Chevalier arcade is the boutique destination on the West side of the city for food, services, doctors, fashion and entertainment. It provides the community with a wide mix of quality retailers, and dining options.

In its aim to meet the needs of its community, its board of directors identified the need to improve the outdoor lighting. After careful consideration, they chose LEDX range of LED panel and Wooter proofed outdoors application (Trios) as the best option

LEDX LED panel-lights and Trios were chosen for their excellent operating life, high efficiency and low total cost of ownership. Not only has improved lighting been successful for the retailers, it has had a considerable improvement in security and safety for those who use the area after dark.
